Featured Experience

Software Engineer

Nu Mexico (Nubank)

Apr 2024 – Present

- Delivered **new features to millions of users** by actively contributing to the Nu mobile app through a Backend-Driven Content **(BDC) architecture**.
- Developed and maintained **unit and integration tests**, improving app reliability and performance.
- Designed, deployed, and maintained micro-services**, supporting scalable service delivery.

Front-End Developer (Mobile heavy)

Borderless

Jun 2023 - Apr 2024

- Contributed to the Borderless mobile app by:
 - Applying **SOLID principles** for clean, maintainable code.
 - Enhanced app efficiency through **CLEAN architecture** and **BLoC state management**.
- Provided support for web application development.

Front-End Developer (Project-Based)

Ideen

Mar - May 2023 & Nov 2023

- Contributed to the development of two web applications and a user-centric mobile app, integrating:
- Cloud services for authentication, storage, and database management.
 - Cloud functions to execute backend processes efficiently.
 - MVVM architecture with Provider state management, following SCRUM methodology.

Awards

Andela's 'EPIC Tournament'

1st place

2022

Coding challenge and Hackathon

A solution focused to improve the remote work experience was developed

MECK-BOT Robotics Tournament

1st place

2017

International robotics competition

An autonomus robot was created and programmed

Independent Projects

Real Time Vis of 3D Models

WHA Arquitectos

Development of a web app, powered by the 'Sketchfab' API, that allows the real time interaction and visualization of 3D models.

Save The Zombie

Development of a mobile game compatible with Android and IOS devices.
